ELECTRIC TOWEL RAILS

Imagine the feeling of reaching for a perfectly heated towel or bathrobe after a refreshing shower. Electric towel rails give you that luxury every day! Elegant heated bars and ladders are available in a variety of sizes, shapes and several gorgeous colors, so you can easily find the right piece for your bathroom. Installation is simple - you can plug them directly into a socket or integrate them neatly into the wall. Thanks to the smart display, you can easily set the ideal temperature and heating time, meaning you can enjoy warm, dry towels all year round.
Treat yourself to the comfort and style you deserve!

Electric towel rail, ladder

Brighten up your bathroom with stylish heating ladders that combine a modern look with practical use.
We offer them in three sizes and three elegant colors, so it's easy to choose the perfect option for your interior.
The heating ladders efficiently dry towels while pleasantly heating the entire space, contributing to greater comfort in everyday use.

Electric towel rail, bar, mini

Bring modern elegance to your bathroom with our slim 1180 mm long heating bars, available in several stylish color options. These heated towel bars feature a display for easy temperature and heating time adjustment and can be complemented with a handy hanger, ideal for drying a bathrobe, for example. Thanks to flexible installation (by plugging into a socket or discreetly integrating into the wall with an adaptor), it's easy to choose a solution to suit your needs.

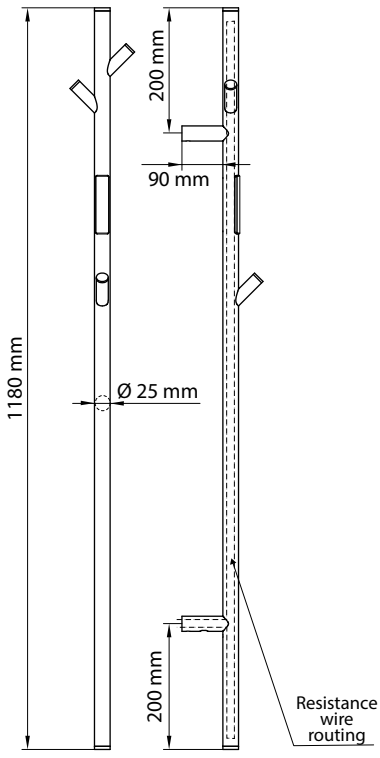
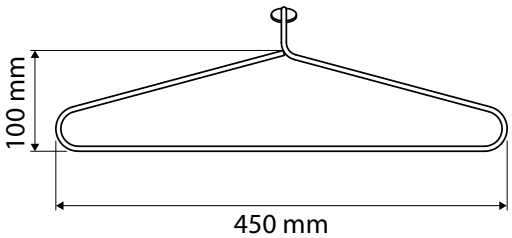
Hanger
Handy helper, not only for drying for just drying a bathrobe. Simply just hook to the heating rod.

Concealed connection kit for electric towel rails
Enables elegant and safe connection of the heater ladder directly into the wall. It is available in coloured matching with the design of the heating elements.





Concealed connection kit for electric towel rails

This adapter allows direct and aesthetically clean connection of electric towel rails directly into the wall, without a visible power cable. It is designed for models with pipe diameters smaller than 32 mm (mini electric ladders and mini heating bars). Thanks to its compatibility with flush-mounted electrical boxes, it ensures a safe, discreet and professional connection.
The adapter is available in colors to match the design of the heating elements.
